

IRO Certificate #4599

NOTICE OF INDEPENDENT REVIEW DECISION

July 24, 2003

Re: IRO Case # M2-02-1125

Texas Worker's Compensation Commission:

___ has been certified as an independent review organization (IRO) and has been authorized to perform independent reviews of medical necessity for the Texas Worker's Compensation Commission (TWCC). Texas HB. 2600, Rule133.308 effective January 1, 2002, allows a claimant or provider who has received an adverse medical necessity determination from a carrier's internal process, to request an independent review by an IRO.

In accordance with the requirement that TWCC assign cases to certified IROs, TWCC assigned this case to ___ for an independent review. ___ has performed an independent review of the proposed care to determine if the adverse determination was appropriate. For that purpose, ___ received relevant medical records, any documents obtained from parties in making the adverse determination, and any other documents and/or written information submitted in support of the appeal.

The case was reviewed by a physician who is Board Certified in Anesthesiology and Pain Management. He or she has signed a certification statement attesting that no known conflicts of interest exist between him or her and any of the treating physicians or providers, or any of the physicians or providers who reviewed the case for a determination prior to referral to ___ for independent review. In addition, the certification statement further attests that the review was performed without bias for or against the carrier, medical provider, or any other party to this case.

The determination of the ___ reviewer who reviewed this case, based on the medical records provided, is as follows:

History

The patient is a 40-year-old female who has had chronic low back pain after a lumbar fusion and multiple treatment modalities. The patient has a sixth grade education. She has completed 15 days of a pain management program. Another 10 days are requested.

Requested Service(s)

Pain management program 5xweek/10 days

Decision

I agree with the carrier's decision to deny the requested treatment.

Rationale

The patient has made subjective improvement, but there is little improvement in pain levels. An individual with a limited education is a marginal candidate for a PMP, as there are sophisticated concepts that are often difficult to grasp without secondary level education. The patient has made some progress, but based on the records provided for this review, the likelihood of continued progress in this patient is slim.

This medical necessity decision by an Independent Review Organization is deemed to be a Commission decision and order.
